## MUSTARD GAS WORST

Most Horrible Invention Huns Use in War.

It Brings Tears and Causes Painfu Skin Diseases Among

Washington.—The most dangerous kind of poison gas used by the Ger mans is "mustard gas," or dichloro

diethysulphide,
Mustard gas has a distinctive but Allustard gas has a distinctive but altogether unpleasant smell, more like garlic than mustard. It is heavy and ofly as a liquid. It boils at 217 degrees centigrade, and thus has proper ties whereby it can be distributed in the form of a spray on the impact of a

Mustard gas is a powerful producer of tears. After several hours the eyes begin to swell and blister, causing to tense pain. The nose discharges freely, and severe coughing and voniting ef-

Direct contact with the spray causes blistering of the skin, and the vapor penetrates through the clothing. Gas masks, of course, do not protect against this. The symptoms are similar to pacumonia — high fever, heavy breathing and often stupor.

The damage done by mustard gas is a slow and insidious development. The

breaking down of the affected tissues is slow, the height being reached from five to ten days after the burn is re .. ceived. The painlessness is also a marked characteristic. Healing is

Mustard gas besides being used in direct attack, is also used for "neutra-lization." For instance, where supplies Mr. and Mr. and ammunition are being brought up, a few mustard gas shells will result a few mustard gas are in the control of the interpretation and delay. A part of the interpretation of the inte neutralizes, so much the better.

The American mask to fight mustard gas is of the box respirator type. The hood is of rubber. Breathing is through the mouth, pincers shutting.
